Hi Everyone!

The spirit of the season lingers on into the New Year! We hope your Holidays are filled with wonderful memories with your family and friends!

This is an ideal opportunity to reflect on your Club. I would like to express our gratitude to each of you for being loyal Iowa Trust and Savings Bank customers.

Thank you Prestige Club Members for your continued support and participation as we begin the New Year! Let's continue to keep the momentum going for years to come! Your Club gives you banking benefits, opportunities for social connections, education, entertainment, travel and much more. Invite your friends to join the Prestige Club.

In the upcoming months we will have more events and opportunities to have "Fun'cations" with friends. Remember life is measured in special moments!

This past month I was able to learn and explore the Travel Iowa Marketplace where hundreds of exhibitors around Iowa look forward to sharing with planners and Bank Club Directors their exciting destination. There are many communities close to home that I am sure you have driven through. It is time to stop and explore to find out why they are so unique. We are thankful for the group response and interest in our travel programs. Stay healthy, stay connected and enjoy life! Hope to see you soon,

Lois

Social Media

The Safety and Security of using social media needs to be used carefully. Facebook, Twitter, Instagram, Linkedin, You Tube and the many other social networking sites can lead to identity theft, criminals, and unwelcome strangers.

Personal Profile….

What do you include in a personal profile? Do you really want to post your address and your phone number? What about the other details, like something as simple as posting your pet's name or your mother's maiden name. A criminal could use this information to answer a "security question" that gains access to your financial accounts?

When you post personal information, including pictures, treat it like it's there for anyone to see---even if you think it's private or restricted. Think twice about posting when you're traveling away from home. If someone you think you know sends you a request through social media that involves money or clicking on an unusual link, it may be from an account that someone has hacked.

Be Careful Clicking…..

Be careful when you click on links and downloading attachments, even if they appear to come from someone you know. Both can expose your computer to viruses or spyware. Be cautious about downloading attachments. Use your firewall, anti-virus and anti-spyware software, as well as spam filters, and be sure to keep your software and browser updated..

Password Protection……

Use strong and unique passwords and don't send them to anyone. If you use the same password for several accounts, those accounts are particularly vulnerable. When you're on a public computer, don't allow the computer to store your login information.
